Due to the new National Lockdown - we have decided to offer some repair services remotely rather than stay completely closed - we can replace any screen, battery, charger port or fix software issues with your phone - please enquire either through the contact form or call 01803 551115 for information and help. Once we have verified your request and the price - you can either mail in your device or post it directly to our mail box and then once its fixed we will call you to collect it - usually the same day.
